IN THE CLAIMS

LCM 1-4.

1-4. (cancelled)

- (previously presented) A composition comprising:
- a cyclodextrin-containing polymer,
- a therapeutic agent, and
- a complexing agent, comprising:
 - at least one guest moiety that forms an inclusion complex with a host moiety of said cyclodextrin-containing polymer, wherein the guest moiety is selected from adamantyl, naphthyl, cholesterol, and combinations thereof, and
 - at least one polymer portion that increases solubility and/or imparts stabilization relative to a composition of the cyclodextrin-containing polymer and therapeutic agent alone:

wherein the cyclodextrin-containing polymer, the therapeutic agent, and the complexing agent are separate molecules.

- 6. (previously presented) A composition of claim 5, wherein said therapeutic agent is selected from an antibiotic, a steroid, a polynucleotide, small molecule pharmaceutical, a virus, a plasmid, a peptide, a peptide fragment, a chelating agent, a biologically active macromolecule, and mixtures thereof.
- 7. (previously presented) A composition of claim 6, wherein said therapeutic agent is a polynucleotide.
- 8-11. (cancelled)
- 12. (currently amended) A composition of claim 5, wherein the complexing agent is a compound of the formula:
